DELEGATE, DISTRICT 41

By Authority of: Dalya Attar for Baltimore, Sara Goldfeiz, Treasurer

# END OF SESSION 2021 Newsletter

## Dear Friends & Neighbors,

I am extremely proud to inform you that the Maryland General Assembly's 442nd session is now over and was an extremely unique yet productive session for all Marylanders. Notwithstanding the COVID-19 related limitations during this legislative session, my colleagues and I worked harder than ever to ensure Marylanders are provided for and well-represented during these crucial and difficult times. I write this end-of-session newsletter proudly, as I am confident that my hard work this session will help all my constituents in so many ways.

## Pandemic Relief and Recovery

### SB 496 – Recovery for the Economy, Livelihoods, Industries, Entrepreneurs, and Families (RELIEF) Act

What a relief! Many Marylanders continue to suffer financial hardships as a result of COVID-19. This session we took a historic step with the bipartisan passage of the Recovery for the Economy, Livelihoods, Industries, Entrepreneurs, and Families Act, AKA the RELIEF Act, which provides over \$1.5 billion in pandemic relief. The RELIEF Act will infuse the State's economy with \$509 million in spending and provide over \$1 billion in tax relief and credits.

- Maryland becomes the highest state in the nation for its earned income tax credit, which puts cash in the pockets of low-income Maryland taxpayers.
- Maryland also raises its earned income tax credit for individuals with no children from nearly \$100 to \$530.
- Unemployment insurance payments will be exempt from the State income tax, keeping over \$225.0 million in the pockets of unemployed Marylanders.
- Marylanders who qualified for the earned income tax credit in 2019 will be provided with stimulus payments of up to \$500, putting over \$175.0 million immediately in the hands low-income individuals and families.
- Allows small businesses to keep sales tax collections of up to \$9,000 over three months.
- Helps up to 100,000 small businesses & nonprofits to defer paying unemployment insurance taxes until the first three months of 2022 to help cash flow (they employ ¼ of MD workforce).
- Forgives MD taxes on COVID loans and grants.
- Minority and Small Business Loans (MSBDF): Converts up to \$50,000 in Equity Participation Program loans to grants.

### HB1372 – Blueprint for Maryland's Future – Revisions

After a year of distance learning due to COVID-19 school closures, a growing number of students are falling further behind. This legislation revises the Blueprint in response to the current state of education and gives students a path forward. The Blueprint 2.0 bill includes needed fixes to education funding that were exposed by the COVID-19 pandemic and:

- Provides more support to address learning loss;
- Expands behavioral and mental health resources;
- Closes the digital divide with more access to broadband and devices; and,
- Requires better reporting and data tracking for more accountability.

# Unemployment Insurance Reform Package

One of the most important parts of my job is constituent services. Since the pandemic, I have had more requests for assistance from constituents than ever before. Many of these requests stemmed from the unemployment insurance system. I am extremely proud to have helped so many constituents obtain their benefits, and I am extremely satisfied with all the time and effort we put in this session to ensure my constituents are no longer put in such a difficult situation.

The pandemic has shown us that Maryland's unemployment system was unprepared for a statewide emergency and needs to be reformed. The Unemployment Insurance Reform Package will get relief to Marylanders who need it most, when they need it the most.

Over 4000 Marylanders reported that they were unable to get assistance because the State has been using an outdated, broken system that needs short and long-term fixes. Immediate and structural fixes that will help streamline the process and make the UI system more efficient include:

- Modernizing the UI system to ensure that Marylanders can get the money they deserve;
- Improving customer service;
- Creating more accountability; and
- Planning for the next emergency.

## HB 907/SB 817 - Unemployment Insurance - Study on System Reforms

House Bill 907 requires the Department of Labor and the Department of Legislative Services to study unemployment insurance reforms and report its findings to the General Assembly.

## HB 908/SB 816 - Unemployment Insurance - Employer Contributions and Reimbursement Payments

House Bill 908 requires the Department of Labor to implement flexible payment plans for employers to pay their unemployment taxes. Allowing employers to pay their unemployment taxes incrementally over time instead of paying one lump sum will help more businesses as they recover from the pandemic.

## HB 1002 - Unemployment - Insurance Revisions and Special Enrollment Period for Health Benefits

House Bill 1002 makes improvements to the unemployment insurance process by expanding language and disability access, establishing greater customer service standards, providing more accountability within the appeals process, and requiring more information about any over-payments that occur. The bill helps unemployed Marylanders make sure that they continue to have health insurance.

### **HB 1138 - Unemployment Insurance – Maryland Department of Labor– Accountability & Oversight**

House Bill 1138 requires the Department of Labor to have a disaster plan in place whenever a drastic increase in unemployment claims occurs.

### **HB 1139/ SB 819 - Unemployment Insurance – Weekly Benefit Amount – Income Disregard**

This bill raises the amount of weekly income an unemployment insurance claimant can earn from \$50 to \$200 throughout the duration of an emergency. This will allow more people receiving UI benefits to seek part-time work and supplement their UI benefits.

### **HB 1143/ SB 771 - Unemployment Insurance - Work Sharing (Work Share Expansion Act of 2021)**

This bill adjusts the amount of time an employer can temporarily reduce an employee's work hours under the existing work share program - making State law consistent with federal law. This bill will allow more Maryland employers retain employees and help more employees get back to work following the COVID-19 pandemic.

## **Protecting Businesses During this Pandemic**

Businesses have been hit very hard during this pandemic. Many small businesses have had to either permanently close or go to extreme lengths to keep their businesses from having to close their doors forever. And now, after all this, many businesses face the prospect of having to defend lawsuits filed as a result of this pandemic.

I therefore sponsored House Bill 508, COVID-19 Claim – Civil Immunity – which support businesses and organizations during this pandemic in Maryland.

This bill is limited to COVID-19 claims that occurred between March 5, 2020 and 180 days after the Governor's Executive Order is expired or rescinded. This bill states that a person who, in the exercise of good faith, acts in compliance with all federal, state and local statutes, rules, regulations, executive orders and agency orders related to COVID-19 is immune from civil liability for a COVID-19 claim, unless the person's actions amount to gross negligence or intentional wrongdoing.

This bill was unfortunately not voted on in committee. With any luck, our businesses will not end up needing this protection. However, if they do, I look forward to continuing my efforts in providing a lifeline to Maryland organizations that in good faith endeavored to adhere to COVID-19 guidelines.

## Pimlico and Sports Betting

Maryland has been at a competitive disadvantage with other East Coast states who offer sports betting options. Last year at the ballot box, voters overwhelmingly supported a constitutional amendment to allow sports betting in Maryland. House Bill 940 makes Maryland the 21st state in the nation to legalize sports betting, increases funding for education and maximizes the opportunity for minority businesses to participate in Maryland's newly established gaming industry.

This session I was assigned by the Speaker of the House of Delegates to serve on the Racing & Gaming subcommittee. We spent a significant amount of time ensuring the passage of this bill in a way that is best for all Marylanders.

Pimlico is more than just horse racing. It is a place that offers significant potential for our community. Since my first session in Annapolis, I have made the redevelopment of the Pimlico Race Course one of my top priorities. Our neighborhood deserves to live up to its potential. This redevelopment will not only ensure a safer neighborhood by not leaving this large area vacant, it will provide our community with significant revenue, and the multi-use development will serve as a place where our district's families can bring their children.

As Delegate of the district that represents Pimlico, my priority is to make certain that Pimlico is on the same playing field as all the other racing facilities. I spent countless hours on the record and off the record advocating amongst my colleagues to ensure Pimlico is properly addressed in this bill. As written, the bill only allowed sports wagering at Pimlico during live racing days. After much advocacy, I was successful in ensuring sports wagering is allowed at Pimlico 365 days a year, which will not only increase revenue, but it will lead to additional investment and redevelopment at Pimlico.

## School Funding

### HB 1 – Funding for Historically Black Colleges and Universities

While the State has increased operating and capital funding to the HBCUs over the past decade, additional investment is needed to increase the availability of new and distinct programming to attract more students to HBCUs resolving a decade-long federal court case. I therefore supported House Bill 1 which provides \$577M to resolve the program duplication issues in Maryland's four HBCUs and level the playing field for all students – regardless of background, or race, or college they attend.

### SB 433 - Institutions of Higher Education - State Funding - Revision

Senate Bill 433 clarifies the State's formula to ensure that funding to community colleges in the state are calculated equitably and are fully funded in the same way as four-year institutions. The bill also provides \$7 million to the School of Medicine for doctors in specialty areas to support better healthcare delivery at University of Maryland Capital Region Hospital and University of Maryland rural hospitals.

### State Tuition Assistance - BOOST Funding

Schooling should not be one-size-fits-all. Every child is unique, and the amount of money a parent makes should not determine what school the child attends. The child's abilities and uniqueness should be the factors determining his school. We must therefore be certain we are supporting all children in ensuring they obtain a proper education tailored to their needs.

The Broadening Options and Opportunities for Students Today program is a scholarship program that helps low-income students pay for non-public school education. After spending a significant amount of time advocating for this program, I am pleased that 10 million dollars was allocated in this year's budget, which represents a 3 million dollar increase. In addition to this funding, an increase of 9.5 million dollars was allocated for the non-public schools' textbook and technology program.

## Fighting Hate Crimes & Security Grants

We are unfortunately living during times that we have seen a significant increase in hate crimes. My committee worked on and passed House Bill 418 out of the House of Delegates, which requires each county board of education to adopt a policy prohibiting the use or display of a symbol of hate on school grounds or in any program, service, school building or activity funded in whole or in part by State funds. This bill did not pass the Senate; however, I look forward to working on this bill again next session in the hopes of it passing both chambers and becoming law.

As a result of the increase in hate crimes, we must ensure those at the highest risk of being targeted are protected. I am therefore pleased to inform you that my efforts to obtain appropriate funding was successful, and nearly 9 million dollars was provided in grant funding to those at-risk, which includes houses of worship.

### Budget

Money that the State spends comes from our pockets. It is therefore a priority of mine to ensure we pass a balanced budget that helps all Marylanders and does not waste our money. Fortunately, after much work this session, we passed a balanced budget that ensures this is so.

### HB 588 and HB 589 – FY22 State Budget

After facing a billion-dollar deficit due to the COVID-19 pandemic last year, we passed the FY22 budget that eliminates the structural deficit for the next two years, restores the Rainy-Day Fund, and leaves a cash balance to account for unforeseen impacts from COVID. The budget fully funds healthcare and education funding while putting \$1.5 billion into construction projects to get people back to work.

### HB 590 – Capital Budget

The Capital Budget leverages nearly \$2B in state capital spending – prioritizing education, recreation, and support for localities. In addition to the \$2.2B dedicated to school construction, the budget provides an extra \$320M to build schools, modernize classrooms and provide the necessary equipment so schools can safely re-open. State and local parks will receive \$130M to maintain the parks and playgrounds around the state after record use. The budget also approves a record 275 bond initiative requests totaling over \$75M to stimulate local investments.

## Funded Projects in the Budget for the 41st District

Making certain that projects that directly affect our constituents are funded is a priority of ours. During this legislative session, the 41st Delegation was successful in securing 2.325 million dollars in funding for 11 capital projects in the district, which is an increase of 86 percent from 2020! Below is a description of each project and the amount of money secured

### Forest Park Senior Center (\$250,000)

The funds will be used for the acquisition, planning, design, construction, repair, renovation, reconstruction, site improvement, and capital equipping of the Forest Park Senior Center.

### Gaudenzia Foundation Inc (\$450,000)

The funds will be used to update the HVAC system of Gaudenzia Inc. Weinberg Center.

### Ivy Family Support Center (\$300,000)

The funds will be used to support the educational, charitable, cultural, and general welfare of economically and socially disadvantaged residents of Baltimore City.

### Langston Hughes Community, Business and Recourse Center (\$150,000)

The funds will be used to renovate the center with needed repairs, including replacing the roof, updating the electrical paneling, repairing the HVAC system, and replacing floors.

### Ohr Chadash Academy (\$350,000)

The funds will be used to build indoor and outdoor spaces for gym, recess, and extracurricular activities to provide students with structures and equipment to have healthy outlets and physical activities.

## Funded Projects in the Budget for the 41st District - cont.

### Pimlico Market Café (\$175,000)

The funds will be used to bring another thriving business to the block that creates access to healthy and affordable food, provides additional employment opportunities for neighborhood residents, as well as workshops, cooking demonstrations and other programs to encourage and promote the concept of healthy eating and living a healthy lifestyle.

### Roland Park Community Foundation (\$250,000)

The funds will be used to purchase additional field and recreational space for the use of the students of Baltimore Polytechnic Institute and Western High School.

### Social Settlement House (\$100,000)

The funds will be used to build a brand new, 2,600 sq. ft. energy efficient, handicap accessible building, located at 5345 Denmore Avenue, Baltimore, 21215. This building, which will be close to public transportation and within walking distance to Arlington Elementary School, will feature mental health offices, open space, a podcast studio, and showering and laundry facilities.

### Temple X Experiential Community Center (\$200,000)

The funds will be used to create an engaging space for health education, wellness programs, and chronic disease management for members of the community, as well as to create flexible spaces for Temple X Lab School that will be used for early childhood education through middle school students for programs that lead to improved academic skills and social emotional development.

### West Arlington - Playground Project (\$100,000)

The funds will be used for the acquisition, planning, design, construction, repair, renovation, reconstruction, site improvement, and capital equipping of a playground project located in West Arlington, including bathroom renovations and the addition of fencing and a volleyball court.

### West Arlington - Water Tower (\$250,000)

The funds will be used for the acquisition, planning, design, construction, repair, renovation, reconstruction, site improvement, and capital equipping of the West Arlington Water Tower structure and grounds.

## Police Reform and Accountability Act of 2021

Misconduct of any form is not acceptable. We must remove and hold accountable anyone who exhibits misconduct. This includes police officers. This session, we were successful in enacting laws that will assist our police departments in removing the officers who are doing wrong while ensuring the safety of all residents.

We enacted legislation addressing many areas, including enhancing civilian-driven transparency in police misconduct, supporting civilian complaints, swift and uniform penalties for police misconduct and police accountability boards, amongst others.

We also passed a law providing 10 million dollars in funding tuition support to encourage diversity in the ranks of law enforcement.

### Body Cameras

As an Assistant State's Attorney in Baltimore City who has watched countless hours of body camera footage, I can attest first-hand to the importance of body cameras. I therefore am extremely proud to inform you that we passed extensive legislation supporting body cameras. For the first time ever, all local and state law enforcement officers will be required to wear body cameras by the year 2025.

## CRIME

Every single day I read about another incident of violent crime in our communities. It is disheartening and frightening. We all have the right to feel safe. We all should feel safe. And, most importantly, we all should be safe. When I am not in session, I work as a prosecutor in Baltimore City, where I fight to keep us safe and for justice. While I am in session, this continues to be a priority of mine.

### Protect Act

One thing I continuously say is that there is not just one solution to reducing crime. As a prosecutor who has incarcerated many people, I believe more must be done. Therefore, last session I sponsored the PROTECT Act - Public Resources Organizing to End Crime Together last session. This bill is established to maximize the use of State, local, and community resources to combat neighborhood decline in Baltimore City and throughout the State, support comprehensive strategies to reduce crime and fear in those communities, and ensure that Baltimore City Police Department sworn officers are utilized in direct public safety roles. This bill also allows State law enforcement agencies to have concurrent jurisdiction over I-83 and I-295.

The Governor vetoed this bill, and I am extremely proud to announce that we voted to override the Governor's veto this session and therefore the PROTECT Act will be law!

### Gun Straw Purchases - Penalty

We have an enormous number of illegal handguns on our streets. A gun straw purchase is when a person legally purchases a gun and then sells it to an individual who is either a minor or is prohibited from possessing a handgun due to prior criminal convictions. Straw purchases are causing many illegal guns to flood our streets.

I therefore sponsored House Bill 669 - Firearms Straw Purchases Penalty. This bill changes the classification of the crime from a misdemeanor to a felony - no longer treating straw purchases in the same category as crimes like trespassing. The maximum penalty remains 10 years' incarceration. This alteration will deter individuals who are law-abiding citizens on paper and keep purchasing handguns as law-abiding citizens, when really, they are the ones causing a lot of violence in our streets. Additionally, this alteration will allow law enforcement agencies to be able to indict these cases and use more resources on charging and prosecuting these cases.

This bill was unfortunately not brought to a vote in committee; however, I will continue my efforts next session in reducing violence.

## Victims of Juvenile Crime

Time and time again I hear from victims of violent crime committed by juveniles. These victims are kept in the dark and cannot get information about their case. We must no longer allow victims of violent crime, who are already suffering so much from being victimized, to be treated poorly and kept in the dark. I therefore sponsored House Bill 672 – Juvenile Offense Database. This bill creates a database that provides a general description of any action, judicial or otherwise, taken in relation to a juvenile alleged to have committed an offense. This bill was unfortunately not brought to a vote and will not move this session.

*I look forward to continuing to fight for our victims of violent crime, rehabilitation for juveniles and transparency in the juvenile justice system.*

## SB 202 – Correctional Services - Parole - Life Imprisonment

Decisions about parole should never be political. I therefore supported Senate Bill 202 which takes the Governor out of parole decisions for those who are sentenced to life in prison after 20 years. Maryland will now join most states who follow this model. This bill ensures the parole process is independent and fair.

## HB 742 - The Walter Lomax Act

As a prosecutor, I can honestly say one of my worst fears is the possibility of an innocent person ever being convicted. No amount of money is sufficient to repay someone for the freedom they lost. However, since we cannot rewind time, we must at the very least ensure we are timely and sufficiently compensating innocent individuals who were erroneously convicted. I therefore supported House Bill 742 which provides appropriate compensation through the Board of Public Works for individuals who are erroneously convicted, sentenced, and jailed. There needs to be a consistent process in place to provide restitution and adequate resources so those who have been exonerated can have a better quality of life when they re-enter society.

## Fairness in Taxing

### HB 1246 -Vehicle Excise Tax - Leased Vehicles - Alteration

The current law in Maryland for leasing a vehicle is you pay a 6% tax on the total purchase price of the vehicle. In other states, like New York for example, you pay taxes on the price that you are actually paying to lease the vehicle. Say I go to the store to buy a pair of shoes that cost \$80. The shoes are now on sale for \$54. I purchase the shoes and pay \$54 for the shoes plus 6% tax on the \$54. I am obviously not charged 6% of \$80. So why are we in Maryland being charged 6% on the price of the vehicle, which is not the amount we are paying to lease the vehicle?

I therefore sponsored House Bill 1246 – Alteration to the Leased Vehicles Excise Tax. This bill alters the vehicle excise tax imposed on a leased vehicle by specifying the tax imposed is equal to the 6% of the capitalized cost reduction and each monthly payment. This bill is about fairness, affordability, safety, and the environment. When a

person leases a vehicle, it is a brand-new vehicle, and they make monthly payments. This gives many people who may not be able to afford to purchase a brand-new car, the ability to drive a safe car.

This bill as written has a significant fiscal impact, and therefore, because of my filing this bill, during the interim we will have a workgroup working with the Maryland Department of Transportation on analyzing this tax and determining ways to phase it out to ensure fairness in taxing Marylanders. I look forward to continuing this effort during the interim and re-filing this bill next session to ensure its passage.

### HB 158 - Property Tax – Homeowners’ Property Tax Credit – Calculation and Refunds

During this session, I had the opportunity to be the floor leader on this bill. This bill compensates homeowners who received the homeowner's property tax credit but did not receive as much as they should have because of a miscalculation by SDAT. We must ensure calculations are computed correctly and homeowners receive the money that is rightfully theirs. This bill fortunately passed both chambers and will become law.

## Environment & Energy

As a mother of a young child with severe allergies and asthma who has been told time after time by his doctors that the state of our environment affects his breathing negatively, I believe having a healthy environment is crucial.

### Lead Poisoning Prevention Commission

The Speaker of the House of Delegates appointed me this session to represent the Maryland House of Delegates in the Maryland Department of the Environment Lead Poisoning Prevention Commission. Many, many children are affected every day by this poison and suffer the rest of their lives due to being contaminated. It is our duty to ensure our children do not continue to be affected by this poisoning, and I look forward to continuing working on this commission to ensure the safety of us all.

### HB 507 – Clean Water Commerce Act

This bill would stop the sunset of the fund and increase the allocation from the Bay Restoration Fund Wastewater Account from roughly 10M up to 20M through 2030.

Of that 20M, 35% (highest share) would be allocated toward agricultural projects, which it is not currently eligible, and prioritize tackling nitrogen levels, which is the largest share of pollutants and more expensive to take on. An additional 20% of the share would go toward projects in disadvantaged communities for storm water projects and green infrastructure.

To meet environmental goals, it is crucial that the state continues to address pollution levels caused by other sources. Maryland has done exceptionally well to reduce pollution from wastewater facilities and while there is more work to do, it becomes increasingly important to address pollution coming from agriculture and other sectors.

### HB 30 - Office of People's Counsel Environmental Reform Act

House Bill 30 ensures that climate change is part of the conversation when energy and utility regulations are considered at the Public Service Commission. House Bill 30 creates a climate counsel position to advocate at the PSC on climate change issues the way the people's counsel advocates on ratepayer issues. This legislation takes affirmative steps to meet our greenhouse and gas reduction goals.

### HB569 - Electricity - Net Energy Metering - Limit

House Bill 569 doubles the state capacity for residential rooftop solar and community solar projects .

### SB 65 - Renewable Energy Portfolio Standard - Qualifying Biomass (Black Liquor)

House Bill 875 removes black liquor from Maryland's Renewable Portfolio Standard. Black liquor is a by-product of paper mills and a caustic pollutant that makes its way into our air and waters. Climate change is an existential threat; if we want to address it, we cannot continue to subsidize black liquor.

## Election Reform

Voting is a right that cannot be taken away from us. Voting is our voice being heard. We must ensure all Marylanders can vote. As a member of the Ways and Means Committee, we spent a significant amount of time working on legislation to safeguard this right.

### HB 745: Election Law - Early Voting Centers

This bill modernizes the state's formula for Early Voting centers and will result in over a dozen new centers across the state for the 2022 election. We have embraced early voting as a practical and helpful option for voters to improve accessibility to the ballot box. This legislation also requires local boards of elections to consider equity and maximizing participation when placing Early Voting centers. Other factors local boards must consider include historically disenfranchised communities, access to public transportation, and proximity to dense populations.

### HB 1048 - Permanent Absentee Ballot List

The House passed HB1048 to make voting easier and more convenient by creating a permanent mail-in ballot option. Marylanders who want to vote by mail in future elections will not need to request a ballot for every election. Elections during the pandemic have shown us that our existing mail-in voting process works and that voters should be able to choose the option that works best for them. This is an important step towards a more accessible and equitable democracy.

## Ensuring rental properties are properly registered & inspected

In Baltimore City, all landlords are required to register their rental properties, and in order to get a registration, the landlords must inspect the properties, including lead paint inspection. The problem we see all too often in the city is landlords are not registering their properties and properly inspecting them, yet they are evicting tenants. I therefore sponsored House Bill 523, Baltimore City - Repossession for Failure to Pay Rent - Registration and License Information. This bill prevents a Judge from issuing a warrant for eviction unless the landlord has a proper license. This bill is very simply requiring landlords to do what they are supposed to do.

This bill passed the House of Delegates but did not have a vote in the Senate. I look forward to re-filing this bill next session to continuing the fight protecting tenants and reducing bad actors

## Opioid epidemic

Although we are still living through the Covid pandemic, we cannot forget that the opioid epidemic persists. Our loved ones continue to lose their lives because of this.

As I continue my work bringing awareness and assistance to those who suffer from this disease, I took some time during session to help disburse Narcan within the communities. This effort continues and if you would like Narcan, please visit my website to request it.

Do you want the ability to save a life?

Narcan counteracts the life-threatening effects of an opioid overdose.

Register to receive Narcan and possibly save a life at [dalyaattar.com/narcan](http://dalyaattar.com/narcan).

Details on pickup date, time and location to follow.

## Delegate Attar's College Scholarship

The deadline to apply for my 2021-2022 college scholarship has passed, but be sure to visit my website, [www.dalyaattar.com](http://www.dalyaattar.com), in January of 2022 for information to apply for the 2022-2023 school year. As someone who worked full time during college and law school and is still left with a significant amount of student loans, I understand how difficult paying for schooling can be, and I want to be sure to help in any way possible. For those of you who applied for 2021, scholarship awards will be made in the coming months.

Thank you for entrusting me to represent you, and I look forward to a successful interim continuing to work hard on behalf of all my constituents. Please feel free to reach out to me at any time. My email is [dalya.attar@house.state.md.us](mailto:dalya.attar@house.state.md.us).

Thank you,

*Dalya*
